

Single-use disposable tray for medication preparation in the OR.
Five solutions integrated in one disposable!

Medication double check...

Press the buttons to mark your check. Two buttons pressed down? The double check procedure is secured.

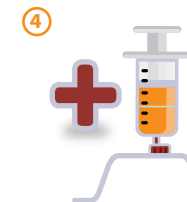

Overview...

Syringes and matching ampoules are positioned directly above each other for overview and safety.

Multiple applications...

Designed for both small and complex procedures.

Emergency...

Have your emergency medication within reach, just in case.

Identification...

The tray provides room for your patient identification adhesives. Have a clear match between patient and medication.

Single-use disposable tray for medication preparation in the OR.
Five solutions integrated in one disposable!

Fast and safe...

The double check of medication preparation is required. The disposable tray makes it easy.

- ① The first anesthesia assistant checks the medication and presses the first button down.
- ② The second anesthesia assistant does the same. Both buttons pressed down?
Both checks have taken place. Clear, easy and safe.
